

PICTURE WINDOW MEASURING SHEET

SASH WIDTHS	Note: Measure the sash in the 3 locations marked on the diagram below. Revival will take an average of these measurements to determine the best width for sash manufacturing. Please note the sash must be removed from window frame to properly take these measurements. Do not measure sash width with the sashes still installed in the frame. Your sash will be too small.
WIDTH 1:	
WIDTH 2:	
WIDTH 3:	
SASH HEIGHT	Note: Measure the height of your sash from the longest points. The sashes typically has a bevel on the bottom where it meets the sill. Measure from the exterior side of the sash. Top of the sash, to the long side of the bevel.
HEIGHT 1:	
SASH THICKNESS	Note: With sashes removed, measure the thickness of the sash.
THICKNESS 1:
